Art Unit: 1742

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bergkvist et al. Bergkvist et al. discloses the invention substantially as claimed.

Bergkvist et al. discloses a method of forming a metal part comprising:

providing a metal powder composition [0011-0012];

pressing the metal powder composition [0016-0018]; and

sintering the pressed metal powder composition to form a metal part [0020].

Bergkvist et al. discloses sintering in hydrogen [0020].

Art Unit: 1742

Bergkvist et al. discloses process parameters that fall within the claimed ranges of Applicant. Furthermore, Bergkvist et al. discloses a metal powder composition that closely approximates and/or touches Applicant's claimed range establishing a prima facie case of obviousness (see *Titanium Metal Corp. v. Banner*, (CAFC 1985) 778 F.2d 775, 227 USPQ 575; *In re Wertheim*, 541 F.2d 257, 191 USPQ 990 (CCPA 1976), MPEP 2144.05).

Bergkvist et al. is silent as to the green compact density, but teaches that this parameter can be modified by adjusting the compaction pressure in order to obtain a desired green body strength.

The Examiner finds that the limitation to a turning geometry turbocharger does not provide weight to the process steps, the process being disclosed as able to form a wide range of parts capable of operating when high density parts are desired [0001].

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1742

5. Claims 1-4 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-33 of copending Application No. 10/697,344 and claims 1-21 of copending Application No. 10/766,154. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims are encompassed by the scope of the copending claims.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
